

TOWARDS INDUSTRY 4.0:

Opportunities for the textile industry

– *VIRTUAL MARKETPLACE* –

From 20th January till 24th February 2021

What?

Industry 4.0 is the future of manufacturing, also for the textile industry. CLAMTEX partnership, is organizing a 6-week interactive virtual workshops for promotion the uptake of Industry 4.0 in the textile sector. During the 6 weeks sessions, you will learn about potential solution that you can apply in your company to drive the digital transformation. The virtual sessions will be highly interactive.

You will be able to present your challenges in the implementation of specific challenges related to Industry 4.0 and receive potential solutions.

In addition, you will be able to participate in virtual B2B meetings with potential providers of industry 4.0 solutions and other textile companies through b2match platform.

When?

A series of six half-day events will be organized between January to February 2021.

Do not miss this opportunity!
Contact your cluster for more details and registration
